## **APPLIED BEHAVIOUR ANALYSIS (ABA)**

### **Seychelles & Nicaragua – ABLLS**

ABA is the science of applied behaviour analysis. It is a scientific way of analysing behaviour in order to understand its' function, and using this information to tailor teaching and learning to individual pupils.

- The children are assessed on the ABLLS (The Assessment of Basic Language and Learner Skills) this assessment is used to form the basis of their individual curriculum. We also follow the National curriculum/Progression of skills at each child's individual level.
- The main focus of each child's programme is to develop functional language and communication skills. Children are taught to use vocalisations (speech) which may be supported and encouraged through the use of sign language/AC. The main focus of each child's programme is to develop functional language and communication skills.
- Other areas of the curriculum include play skills, social skills, group activities and self-help skills.
